Maths Fear Reasons and Steps to Reduce

This article highlights the methods that have been shown to help students, parents, and educators deal with mathematics anxiety.

Comments:

The **title** really reflects the topic of the manuscript.

The **summary** allows to know with easiness the investigation problem. I would include the summary in Spanish also.

The **words key** reflect the most important variables and the population under study.

The review of antecedent investigation is pertinent.

The **description** of the studys allow to answer the investigation question.

Results are described orderly.

The figures and tables present the data with clarity and precision.

The figures and tables are self-sufficient, necessary, and they are explained in the text.

The **discussion** is centered in the data of the study.

The contributions of the study are pointed out with regard to the antecedent investigation.

All the **references** of the manuscript appear in the list.

Global.

The work is well written.

The ideas flow cohesively along the writing.

The study contributes data that advance in the solution of an original problem.
