# Eggplant Peel Extract Cream

National Cancer Institute

## Source

National Cancer Institute. *Eggplant Peel Extract Cream*. NCI Thesaurus. Code C162859.

A cream containing an extract from the skin of the vegetable *Solanum melongena* (eggplant; *S. melongena*; aubergine; brinjal) containing high levels of bioactive components, such as anthocyanins, with potential anti-oxidant, keratolytic, and antineoplastic activities. Upon topical administration of the eggplant peel extract cream, the active ingredients in the eggplant extract may exert antioxidant, anti-proliferative and protective effects on skin cells.
