

Review of: "Population estimates of biomarkers of exposure to carbon monoxide, nicotine, and NNK in smokers and non-smokers"

Zahra Ilyas

Potential competing interests: The author(s) declared that no potential competing interests exist.

The manuscript is written to the best of knowledge. I accept it with minor revision.

1. As many drugs are discuss, it should be discuss as source, risk and prevention for each of one.
2. The flow chart of articles research should be presented.
3. Having good number of articles, you should do forest plotting to check for biased of the article being selected.
4. In flowchart, you should separate all the research engine. Example how many were selected from PubMed.
5. Conclusion need to be re-written
