The authors have carried out a research on " Cloud-based geospatial services for building capacity and safeguarding heritage in climatically marginal landscapes". The manuscript is generally well written with good logic and clear structure. However, there are still some issues which need to be clarified before the manuscript can be accepted for publication. A major revision is necessary before it can be published.

Specific major comments are as follows :

- Rewrite the abstract and make sure to present the results precisely.
- Manuscript must undergo grammatical check (large volume of typo is also found in the manuscript).
- Methodological evolution not clearly explained.
- Figure 4. a) Improve the resolution of the image.
- repeat the cartography in figure 5 again, mentioning the grid units in decimal degrees, and the same for figure 6.
- Citations are provided in the discussion, are you trying to say that these might be the causes, or have you identified the causes? Clarify the same and present in the manuscript.
- Provide proper abbreviations, when presenting them for the first time in the manuscript.
- Rewrite the conclusion presenting the outcomes, and limitations. . Similarly modify the entire manuscript.
- It is necessary to rewrite a more detailed conclusion section considering the comments given above.
