Potential competing interests: No potential competing interests to declare.

By petty corruption is meant that sector of corruption that does not harm the interests of the majority of individuals of a state. In this category can be included the corruption of a medical staff, an official, etc., who through their decisions favor an individual or group of individuals to the detriment of others, but this kind of injustice is limited in time and space. The amounts of money circulated are of low value. Petty corruption occurs in the form of small favors done between a small number of people.
