Review of: The Impact of TikTok on Students: A Literature Review

Qeios ID: EPFGO6

The authors have done a great work in selection of this topic and great efforts in conducting this study. I congratulate you for this efforts. However, the current form of this article is not suitable for publication due to the below reasons:

1. The article is based on literature review approach but no information is provided about the methodology used, search keywords, database selection, inclusion and exclusion criteria. It is suggested to rework on this by following a protocol for extracting articles and reviewing relevant articles to propose any research findings. Currently, this study looks like description/report of Tik Tok impact on students, not like a literature review.
2. Abstract is not clear and it's need revision by adding brief introduction of the study, methodology used, key results and contributions of the study.
3. There is a lot of grammatical errors and proof-reading services are recommended.
4. References are not written properly. Kindly rework on it.
5. The article structure is not clear. Rearrange it , for instance, 1. Introduction , 2. Theoretical framework 3. Methodology used 4. Results and Discussions 5. Conclusions, Implications, Limitations and Future direction.
6. Write in the introduction section, how this study is different from existing studies and add a proper justification supported with suitable citations.
7. Frame 3-4 Research questions and work on addressing those problems as research problem is not clear.
8. The article is too short and hence, there is a need to make it more descriptive.
9. The article title needs to be reframed.
10. Rewrite the abstract based on the revised work as current abstract is not too good. Reframe the keywords.
11. Read different articles which have employed literature review approaches and give one try and I believe **YOU CAN DO IT!**

Good Luck !!
