Phosphatidylinositol-Glycan Biosynthesis Class F Protein

National Cancer Institute

Source

National Cancer Institute. *Phosphatidylinositol-Glycan Biosynthesis Class F Protein*. NCI Thesaurus. Code C104794.

Phosphatidylinositol-glycan biosynthesis class F protein (219 aa, ~25 kDa) is encoded by the human PIGF gene. This protein plays a role in glycosphosphatidylinositol anchor biosynthesis.
