Potential competing interests: No potential competing interests to declare.

Although the topic is interesting, it needs a few changes to become suitable for publication. The abstract needs to be more structured and cover the purpose of the study, the methodology adopted, the main findings, the contribution of the study, implications, and novelty. The introduction is alright. I suggest authors cite some more recent literature.

Suggestions/recommendations are alright, but please add contributions and implications before the conclusion. The conclusion should cover the main findings of the study.
