Potential competing interests: No potential competing interests to declare.

Generally, the manuscript entitled "Crime Prevention through Environmental Design-Enhancing Safety and Livability in Maqboolpura, Amritsar: An Adaptive Approach to Crime Prevention in Informal Settlements" focuses on a topic of sure interest. However, even the topic is interesting, the quality needs substantial improvement.

Particularly the methodology needs to be included, substantiated and filled with content, as this is missing. Moreover, the "case study" doesn't fulfil the quality requirements of a case study as any quality data is missing. Moreover, this is a general lack of the manuscript that in the current version reads like a story, but not like a scientific work.
