Thank you for having the opportunity to review this article. I presented the points that needed to be corrected, which are as follows:

- 1) It is necessary to provide information about the state of addiction in the study areas in the introduction section.
- 2) Provide statistics about people under addiction treatment
- 3) What are criteria for participating in this study?
- 4) The relationship between substance use and other variables under investigation should be considered.
- 5) Limitations and suggestions should be mentioned.
- 6) The method of statistical analysis should be mentioned and on what basis the sample size was chosen.
- 7) I would also encourage the authors to again pay close attention to grammar throughout the manuscript
