

# Review of: "Biological Components in Cucumbers (Cucumis Sativus L.): Implications for Pickle Manufacturing and Health Benefits in Fresh and Processed Varieties"

Neha Minocha

Potential competing interests: No potential competing interests to declare.

The review provides insightful analysis of the biological components and health benefits of cucumbers. The review should add pickle manufacturing techniques used for cucumbers.

The review should add a table mentioning the variability in nutritional composition and biological components in different varieties or if cultivated in different temperate zones.
