Prevalence of Buruli Ulcer Among Residents in Jasikan Municipality: A Cross-Sectional Study

Comments:

Title & Abstract

1. Do the title and abstract cover the main aspect of the work?

The title was relevant to the study. However, for the abstract please make the methodology and result more clear and recommendation always does not part from the abstract structure.

1. Does the introduction provide background and information relevant to the study?

- Yes, but some data / references should be more updated .
- The research problem and lack of research in this area did not clearly explain.
- Authors must show the importance of this research clearly by showing how it is different from previous research and why this research is essential.

Material and Methods

1. Are the methods clear and replicable? Do all the results presented match the methods described?

No, material and method is not clear.

It should start with Study design and study site should be included within study design and too much information should be summarized .

Results

1. If relevant are the results novel? Does the study provide an advance in the field? Is the data plausible?

Equation of Calculation of Buruli ulcer prevalence should be written.

Discussion

1. Do the findings described by the author correlate with the results? Are the findings relevant?

Yes there are relevant finding and correlate with result

Conclusion

1. Do the conclusions correlate to the results found?

Yes there are relevant finding and correlate with result
