

# Review of: "Prevalence and Predictors of Moral Injury in Chinese Physicians"

Elie Bou Sanayeh

**Potential competing interests:** No potential competing interests to declare.

I had the pleasure of reviewing the article titled "Prevalence and Predictors of Moral Injury in Chinese Physicians." It addresses an intriguing topic in public health and highlights a concern that healthcare authorities must address: the mental health of healthcare workers.

I recommend adding a section at the end, before the limitations discussion, to delve into the clinical implications. Authors could offer their insights on how to protect healthcare workers' mental health and provide recommendations for action.
