Review of: "Generating Smart Goals of Engineering Education Institutes in the Fast-Developing Countries"

Ruchi Bhalla

Potential competing interests: No potential competing interests to declare.

Abstract needs more clarification on how the study defines the methodology of the paper. Objectives are not specified in the abstract. Study do justify with the topic but does not provide relevant evidence about how they concluded the study with this result. How can author say that by adopting NEP will help students to gain more?

Study is very vague and does not provide any relevant evidence about the objective on which it has done.
