Dear Editor

This article is not suitable for publication in your journal. No information about the plant used in this study in the introduction section. In material and methods section, the authors did not mention how to identify the plant and the specialist responsible for that, from where the plant was obtained, its voucher number, etc.. In the results section, there are not any phytochemical determinations confirming the isolation of ursolic acid and oleanolic acid. Additionally, there are not any results of the antioxidant parameters that mentioned in the methodology section as well as in the discussion.

Regards
