

Review of: "The Impact of Corruption On Economic Growth: A Nonlinear Evidence"

Muhammad Azam

Potential competing interests: The author(s) declared that no potential competing interests exist.

I have gone through the whole article on "The Impact of Corruption On Economic Growth: A Nonlinear Evidence". Interesting topic selected by the author; however, my observations are given below:

1. Abstract need improvement and it should be in continuous form not separate paragraphs.
2. Introduction part shall be improved largely
3. Rationale, motivations, and objectives are not clear
4. What is the importance of this study? justification required
5. Literature review part shall be strengthened by including latest and relevant studies. Following studies will help:

Governance and economic growth: evidence from 14 Latin America and Caribbean countries. *Journal of the Knowledge Economy*

Does foreign aid stimulate economic growth in developing countries? Further evidence in both aggregate and disaggregated samples. *Quality and Quantity*,
<https://link.springer.com/article/10.1007/s11135-021-01143-5>

Threshold effects in the relationship between inflation and economic growth: Further empirical evidence from the developed and developing world. *International Journal of Finance and Economics*.

The role of Governance in economic development: Evidence from Some Selected Countries in Asia and the Pacific. *International Journal of Social Economics*

Foreign capital inflows, institutional factors and economic growth: Evidences from Republic of Yemen. *Journal of Applied Economic Sciences*

6. Time period shall be extended to 2020
7. Theoretical foundation of the empirical model is missing
8. Estimation techniques need strong justification

9. Unit root tests are missing
10. Discussion is missing
11. Conclusion part shall be rewritten

Decision: Major corrections suggested. After carefully including all corrections, resend the revised version for review.
