Dear Author,

Thank you for your submission to our journal. Upon preliminary review, I have identified areas that necessitate enhancement for the robustness of your research. Firstly, it is imperative that additional data be collected to ensure a comprehensive and quantifiable analysis. Secondly, I strongly recommend consulting with a native English speaker to ensure the linguistic consistency and fluency of the manuscript, as this will enhance the clarity and overall coherence of the content presented. Moreover, integrating more comparative datasets will enable a richer expansion of the results and provide a deeper analytical perspective.

Warm regards,
