Dear Authors,

Make the following necessary corrections in the article.

1. In fig.2 mention X and Y axis scales along with the units in the graph.
2. Mention the keywords at the end of abstract section, so that it will be easier for the author to choose the paper based on their area of interest.
3. Results section is not sufficient. Try to add more simulation graph for the better understanding of the model.
4. The model which you have considered for the simulation not mentioned in the article. Clearly mention the buses, transmission lines etc in the model.
5. Mention the procedure you have followed to obtain the results in flowchart form.
