Acute poisoning by drugs with membrane-stabilizing effect

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. Acute poisoning by drugs with membrane-stabilizing effect. ORPHA:43119

Acute poisoning with a membrane-stabilizing effect is potentially life-threatening. The principle drugs involved are tricyclic antidepressants, chloroquine, some types of beta blockers, class IA antiarrhythmics, carbamazepin and cocaine.
