Dear Editor

Thank you for considering me as a reviewer. This manuscript is about "Carriage of oropharyngeal bacteria among children in a vulnerable rural population living in a tropical region in São Paulo, Brazil". This manuscript needs major revision.

Comments:

Authors should explain factors observed in Table 1, such as income and color.

Authors should explain more about the cause of all negative results of cultures in identifying the considered bacteria.

Primer for bacterial detection should be written with references in the methods section.

Sincerely,
