

Review of: "A Mini-Review On MXene Based Textiles For Electromagnetic Interference Shielding Application"

Sayan Ganguly

Potential competing interests: The author(s) declared that no potential competing interests exist.

The manuscript entitled, '**A Mini-Review on MXene Based Textiles for Electromagnetic Interference Shielding Application**' discusses MXenes deposited textiles for EMI shielding applications. The review is nice but still I am mentioning some loopholes of this work which should be accounted be publication;

1. It will be better if the author will write a separate segment on MXenes structures.
2. Also mention why MXenes are different than other anisotropic fillers used in EMI shielding.
3. The coating process by MXenes are should be discussed little bit.
4. The graphical abstract is confusing. Better to use some arrow heads to clearly designate fully.
5. Some related articles regarding this are given here for better literature review:
