CDISC Subject Level Analysis Dataset

National Cancer Institute

Source

National Cancer Institute. <u>CDISC Subject Level Analysis Dataset</u>. NCI Thesaurus. Code C103378.

The Subject-Level Analysis Dataset (ADSL) is a one-record-per-subject dataset which contains variables that describe subject demographic characteristics and group the subjects for analysis. ADSL is the primary source for subject-level variables included in other analysis datasets such as population flags and treatment variables.
