

Review of: "The Influence of Music Education on the Academic Behavior for Preschool Children with Autism"

Alethea de Villiers

Potential competing interests: The author(s) declared that no potential competing interests exist.

This research is interesting and relevant. The researchers present logical, clear and easy to read thesis.

I recommend that the article be published after revisions.

However, the authors need to have the article language edited by an English speaker. There are several grammatical issues that need to be resolved, for example on page 3, the sentence "HMEAYC is a researcher... positive help", needs to be deleted as it does not fit.
