Potential competing interests: No potential competing interests to declare.

Your paper provides a good overview of Indian costus and its potential medicinal properties, particularly in the context of the COVID-19 pandemic. To strengthen your paper, here are some suggestions on what could be added:

Literature Review: It's essential to include a comprehensive literature review that discusses existing research on Indian costus, its historical use, and its applications in traditional medicine systems like Ayurveda. This will provide a broader context for your research.

Methodology: If your paper is based on original research or experiments, provide details about the methodology used in your study. Explain how you extracted and analyzed the active constituents, conducted in vitro or in vivo experiments, or performed any other relevant research procedures.

Results: If applicable, include the results of your research or findings. Present data, statistics, and any significant observations that support your claims about the effectiveness of Indian costus against SARS-CoV-2.

Discussion: Interpret the results in the context of your research question. Discuss the implications of your findings and how they relate to existing knowledge in the field. Address any limitations of your study and suggest directions for future research.
