Soluble Tumor Necrosis Factor Receptor Superfamily Member 8

National Cancer Institute

Source

National Cancer Institute. *Soluble Tumor Necrosis Factor Receptor Superfamily Member 8*. NCI Thesaurus. Code C103890.

Soluble tumor necrosis factor receptor superfamily member 8 (~85 kDa) is encoded by the human TNFRSF8 gene. This enzymatically processed protein may be involved in the inhibition of tumor necrosis factor ligand superfamily member 8 (CD30 ligand) binding to its cell surface-localized receptor.
