Belief that a behaviour is compulsory

Behaviour Change Intervention Ontology (BCIO)

Source

[Behaviour Change Intervention Ontology \(BCIO\)](#)

Definition: A that a behaviour must occur.

Comment: The two entities 'belief that a behaviour is compulsory' and 'belief about choice over a behaviour' are different. 'Belief about choice over a behaviour' refers to whether a person believes that they are free to choose to perform or not perform a behaviour. This freedom might arise from a lack of opportunity or rules. 'Belief that a behaviour is compulsory' is specifically about whether there are rules about the behaviour having to occur.

This definition was imported from the Behaviour Change Intervention Ontology (see <https://bciosearch.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.

Definitions imported from the Behaviour Change Intervention Ontology (BCIO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.

Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.

Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.

Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.
