PSA:154-163 Peptide

National Cancer Institute

Source

National Cancer Institute. *PSA:154-163 Peptide*. NCI Thesaurus. Code C2798.

A synthetic peptide based on sequence corresponding to positions 154-163 of the amino acids of prostate-specific antigen (PSA), VISNDVCAQV. Upon administration, PSA:154-163 peptide vaccine may elicit a cytotoxic T-cell response against tumor cells that express PSA.
