Kampung Pelangi Semarang: Its Success, Decline, and the Current Status of the Rainbow Village

Manuscript number: 8VS8IU

Comment:

1. The abstract is already quite informative and coherent but could include the research approach utilized. For example: "This research uses qualitative methods based on surveys..."
2. Add the data collection techniques (e.g., interviews, site visits) and the period/location of fieldwork.
3. For Figure 5, please position it side by side with captions (a) and (b) underneath for better clarity.
4. Implications/contributions: How the findings enhance the existing literature in urban studies, tourism, or community development.
5. Refer to sources published in the last 5 to 10 years (for articles).
