# Pasteurella bettyae

National Cancer Institute

## Source

National Cancer Institute. *Pasteurella bettyae*. NCI Thesaurus. Code C86638.

A species of aerobic and facultatively anaerobic, Gram-negative, rod shaped bacteria in the phylum Proteobacteria. This species is nonmotile, non-spore forming, not beta-hemolytic, oxidase, urease, ornithine decarboxylase, and indole negative, phosphatase positive, reduces nitrate, does not hydrolyze esculin or acidify galactose, and slowly and weakly ferments carbohydrates. *P. bettyae* was isolated from human Bartholin gland abscesses and finger infections.
