Review of: "Representations of Lie Groupoids on Bundles"

Tongsong Jiang

Potential competing interests: No potential competing interests to declare.

The manuscript discusses VB-groupoids and provides several examples of such VB-groupoids. The representation of Lie groupoids on vector bundles is also discussed, and it is shown that they provide VB-groupoids.

If possible, please provide specific practical applications of the methods proposed in this manuscript. Alternatively, the author should compare it with existing methods.
