

# Review of: "[Review Article] Green Strategies for the Synthesis of Quinolone Derivatives"

Sonal Dubey

Potential competing interests: No potential competing interests to declare.

The article, in terms of synthetic schemes, is quite elaborate. Since the title says "Green Chemistry," but it contains many schemes which are otherwise also present, there is a need to change the title. The activities can be elaborated more, and some sentences/paragraphs need rewriting, like the antibacterial one.
