I have had the opportunity to review your manuscript titled "A Survey of Large Language Models in Tourism (Tourism LLMs)". I appreciate the effort you have put into your research. After thoroughly going through the manuscript, I found that much work needs to be done to understand how this manuscript is being put into context in the current study. It is not easy to understand the flow of the manuscript as it is not well written and is more like a summary of the topics the author intends to study. Any improvements must be made accordingly for the manuscript to be published. Apart from that, only one reference provided shows that there are no extended references from any previous studies or research, which should be the important essence in building up the framework for the study. Hence, expanding the reference section to encompass a more comprehensive array of scholarly sources is crucial. Please take these comments as constructive feedback aimed at helping you enhance the quality of your manuscript. With these improvements, your work will be even more impactful and contribute significantly to the field.
