

Review of: "The Relationship Between AI Tools and Their Aspects in Higher Education"

Abhinav Juneja

Potential competing interests: No potential competing interests to declare.

Paper has been written on a topic that finds a lot of significance in the current landscape of higher education

Following are my findings and suggestions:

1. Title should be more elaborate to the context.
2. The educators for various types of domains can be classified as faculty teaching technical subjects, non-tech subjects, CSE-related branches, and the like. It will give a clearer view of the outcomes.
3. There is a need to improve the overall paraphrasing of the content.
4. Data set used and quality of questions in the questionnaire will be subject to more elaboration.
