Antimicrobial Ayurveda Crops as Superfoods for Export, Conservation & Farmers' Benefit

-

Recommendation: Required Major Changes

Comments:

1. The title is quite vast, encompassing variable parameters, and is not justified in the main body
2. The abstract is quite short and does not contain the results of the current work.
3. Discussion is also very short; kindly properly discuss your results
4. The result portion contains only two tables of results; kindly discuss your results properly
5. No statistical analysis was provided
6. Kindly add a strong conclusion paragraph
7. Not scientifically presented
8. No contribution to the scientific literature
9. Need to improve the methodology section
