Description of the Dataset

- [1.1.6] What is its expected size?

A more precise estimate of the expected size, even if approximative, could be provided.

- [3.2.1.5] Does the repository(ies) assign datasets / outputs with persistent identifiers?

To my knowledge, GitHub itself does not provide any type of persistent identifier service.

- [3.2.2.10] Please specify how long after the project has ended the dataset / output will be made accessible for

I interpret this question as "how long will the data remain accessible after the project has ended?" The response provided does not answer this question.

- [3.3.1] Does your (meta)data use a controlled vocabulary?

Which one?

- [3.3.3] Have you applied a standard schema for your (meta)data?

Which one?

- [4.1.3] Identify the people who will be responsible and their role(s) in the management of the described output

What are their roles?

Final considerations

Could have been more detailed; the addition of more comments would give a more exhaustive explanation to some of the questions, but overall, a nice plan. Well done.
