# Glottic Squamous Cell Carcinoma

National Cancer Institute

## Source

National Cancer Institute. *Glottic Squamous Cell Carcinoma*. NCI Thesaurus. Code C8186.

A squamous cell carcinoma of the larynx that arises from the glottic area. It may remain localized for a long period then in late disease stage, it may spread to the opposite true vocal cord, supraglottic and subglottic areas, and the soft tissues of the neck.

Hoarseness is the presenting symptom.
