

Review of: "Selection of an engineering institution: Students' perceptions of choice characteristics and suitability under the COVID-19 pandemic"

Naveen Bp

Potential competing interests: No potential competing interests to declare.

Author has made a good attempt to understand the “ selection of an engineering institution: Student's perceptions of choice characteristics and suitability under the COVID-19 pandemic”. However few comments are mentioned below:

Author should highlight the type of data used?

Author should provide the self-reported survey report as annexure.

Author should highlight the research gaps effectively

Author should define the scope and objective effectively.

Author should explain how the image and reputation of an institute in public minds plays a significant role in differentiating colleges ?

Author should mention how they made a high-scoring group of students

Author results and discussion is missing

Author should do the effective discussion on table 1.

Conclusion should be more precise
