Potential competing interests: No potential competing interests to declare.

Abstract: Indicate the significance of the study. Add a comprehensive presentation of the methodology [*research design; participants and sampling procedures; and data gathering tools, procedures, and analysis*] and major findings.

Keywords: Use keywords not used in the title. Arrange alphabetically.

Introduction: Organize the presentation of this section. Avoid too much subheading under it. I suggest you discuss here the context and rationale of the study and explain the variables considered.

Methodology: Have a section for your Methodology. You may have subheadings for your Research Design; Participants and Sampling Procedures; Data Gathering Tools, Procedures, and Analysis; and Ethical Measures Considered.

Discussion: Relate your findings to relevant literature and similar works that were published recently (5 years).

Limitations and Future Directions: Indicate the limitations of the current study and your suggestions for future endeavors.

References: Add references that were published in peer-reviewed and indexed journals.
