Potential competing interests: No potential competing interests to declare.

Thank you for contributing to existing research in the area of Graduate Work Readiness and the role of HE in equipping graduates with the necessary skills to compete in the labour market. I commend the author for conducting research in Nigeria and providing perspective on an important area of research. In order to enhance the work I suggest: some more recent literature is included, several articles and Special Issues have been dedicated to themes included in this research and could be reflected upon; more figures and data be included to enhance the significance of the research; closer alignment could be made between the title and the content; the conclusions could be more emotive, encouraging the reader to not only reflect but to stimulate further research in the area to begin validating some of the statements made in this research. Good luck with your future research.
