Potential competing interests: No potential competing interests to declare.

This paper is a review paper. The author should review all recent related work on SARS-COV-2 after 2020. Lots of surveys have been done on the same topic from 2020 to the present date. No new findings have come out from these surveys. The author should include a discussion on the performance of AI and ML technologies on radiology and CT scan images. A few citations are missing in the reference section.
