# Ptosis-strabismus-ectopic pupils syndrome

INSERM

## Source

*INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. Ptosis-strabismus-ectopic pupils syndrome. ORPHA:2999*

Ptosis-strabismus-ectopic pupils syndrome is characterised by the association of ptosis, strabismus and ectopic pupils. It has been described in one family (in a mother and three of her children). Transmission is autosomal dominant.
