The article titled "Development of Education for Sustainable Development Integrated Coastal Conservation Education Kit in Junior High Schools" presents an innovative tool for environmental education, focusing on sustainable development and coastal conservation in the context of junior high schools in Indonesia.

The idea of an educational tool targeting sustainable integrated coastal zones is commendable and holds potential for broader application. However, a more detailed exploration of the kit's pedagogical approach, the integration of sustainable development concepts, and the effectiveness of the educational tool in achieving its objectives would enhance the article's depth.

Utilizing a qualitative approach to explore the impact of this kit will be more meaningful. It can help the author to further explore the full potential of the education kit and further improve it.
