Congenital dyserythropoietic anemia type IV

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Congenital dyserythropoietic anemia type IV. ORPHA:293825*

Congenital dyserythropoietic anemia type IV (CDA IV) is a newly discovered form of CDA (see this term) characterized by ineffective erythropoiesis and hemolysis that leads to severe anemia at birth.
