Potential competing interests: No potential competing interests to declare.

Introduction: The introduction is well written with the background information, research problem, research objective(s), and a proper description of the research question(s).

Methodology: The methods are clearly described to outline the experiments conducted and the authors provide the necessary information with relevance to data collection approach and data analysis technique from these studies.

Results: The results are carefully laid out in a logical sequence and the appropriate analysis has been conducted. The interpretation of the results are carefully discussed with relevance to the research conclusions.

Discussion: The discussion section is relevant to claims that are supported by the data and appear reasonable and the results obtained by the authors is important to various researchers in the world. The authors provide a discussion section to support or contradict the theories and findings discussed.

References: The authors provide an adequate literature review and the manuscript builds upon previous research that is referenced appropriately.

Tables / Figures: The tables are well presented in this manuscript.

The article can be published with minor revisions.
