

Review of: "Perspectives on the Immune System in Sepsis"

areeg abdelrazek

Potential competing interests: The author(s) declared that no potential competing interests exist.

I found the manuscript to be overall well written and described, but it needs a grammar check as some spelling mistakes were found, beside the usage of long sentences with unsuitable junctions.

on the other hand, you ignored the classic treatment protocol like antibiotics or corticosteroids, and whether the strategies suggested in this manuscript maybe used alone or in combined with the old protocol.

I recognized that the authors did their best to release such interesting work but I hope my comments would be a helpful.
