Potential competing interests: No potential competing interests to declare.

The methods employed for the study adequately serve the purpose, and findings were clearly reported. References are recent and adequate. Overall, the manuscript will benefit from some professional language editing to improve English. Carefully check and correct spellings, grammar, sentence cases, punctuations, and typographical errors. The manuscript also requires minor corrections in the following areas:

## *Title*

- **Authors:** An Investigation of The Phytochemical Richness of Fresh Musa Paradisiaca L. (Plantain) Stem Juice and Its Anticonvulsant Potential on Pentylenetetrazole (Ptz)- Challenged Rats
- **Reviewer:** Check sentence case, remove abbreviation. Consider shortening the title by removing details of plant part studied

## *Abstract*

- **Reviewer:** Include a sentence or two on introduction

## *Introduction*

- **Authors:** Additionally, the Ezike-Oba people in Igbo-Eze North LGA of Enugu State, Nigeria, cure febrile (infantile) convulsions by giving a convulsing child the mother's urine to drink.
- **Reviewer:** Is this within context? Since this is a scientific study, why not focus on phyto-remedies you are reporting on?
