Potential competing interests: No potential competing interests to declare.

- The author wanted to evaluate the knowledge of healthcare professionals regarding biomedical waste management during the COVID-19 pandemic.
- It is exciting in terms of the work title. However, the article was written very short. In summary, the purpose of the research is not clear.
- The sampling methodology needs to be specified in detail.
- There are similar survey studies on COVID-19, Waste management, and zero waste in the literature. In order to support the results, the number of references should be increased and it is recommended to discuss the current study with the previous studies.
