The topic seems interesting and a hot topic, you applied Logistic Regression model to figure out the simple idea of planting and growing trees (green legacy) have a positive contribution to combating climate change in Ethiopia and thus promoting sustainable development, but here are some minor revisions to be done before the paper can finally published:

Please write figures captions under the figures not above.

Please cite the data sources in methodology section.

Please cite the reference of binary Logistic Regression model equations.

Please cite the software packages used in the analysis process.

Please provide a photo copy of the questionnaire performed.

Please grammarly revise the whole manuscript.
