

Review of: "Impact of risk factor diabetes mellitus on patients with periodontitis"

SHIVI KHATTRI

Potential competing interests: The author(s) declared that no potential competing interests exist.

The manuscript is well written. However, a few modifications are suggested.

a) The pathogenesis of Diabetes Mellitus affecting the periodontium has to be written clearly; i.e. the formation of AGE-RAGE has been explained but how does it affect the periodontium has not been addressed.

b) There are a few formatting errors as well. The sentence is broken in between and starts from a new paragraph in few places.
