

# Review of: "The Link Between Gastrointestinal Microbiome And Ocular Disorders - A Review"

Sunny, Chi Lik Au

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

Thanks the authors for writing up this interesting review.

Please spell out all the abbreviations upon their first appearance in the text, including the Abstract. E.g. FMT in the Abstract

Besides, I would suggest on different databases search for a comprehensive review article, e.g. MEDLINE, EMBASE, Scopus, Cochrane, Web of Science, and Google scholar.

Besides, animal studies and human studies should be separated for analysis and review. These special limitations could be set over different databases.

Otherwise, this review is stimulating.
